PROFESSIONAL SUMMARY

Frontend Developer with 10+ years of experience across private sector, public sector and academia, currently shipping code at scale at Mercado Libre. Deep React and TypeScript craftsmanship, strong accessibility focus and early adoption of AI-driven engineering workflows. Comfortable leading frontend architecture decisions and operating in English-speaking, distributed teams.

CAREER HIGHLIGHTS

- Code Owner of the Virtual Product Page (VPP) at Mercado Libre — Latin America's #1 e-commerce, serving millions of daily buyers.
- Frontend delivery for Fortune-500 clients (Verizon, Morningstar) and a national-impact public-health platform under the Presidency of Colombia (ClicSalud).
- Preferred Freelancer on Freelancer.com (5-star rating across 17+ international projects) and Employee of the Year 2016 at BIOS — third-party recognition of consistent performance.

TECHNICAL SKILLS

Frontend: React.js (8+ yrs), TypeScript, JavaScript ES6+, Vue.js, Angular, Redux, Next.js, HTML5, CSS3, Sass / SCSS, Tailwind CSS, Responsive Design

UX / UI & Accessibility: Figma → Code, Design Systems, Storybook, Web Accessibility (a11y, WCAG 2.1 AA, axe-core), Core Web Vitals, Lighthouse

Backend & Data: Node.js, Express, REST APIs, PostgreSQL, MySQL, MongoDB, Web Scraping (Puppeteer, Cheerio)

Mobile & AI: Hybrid iOS / Android apps (App Store, Google Play), React Native; LLM agents and sub-agents, Model Context Protocol (MCP), AI-assisted development

Tooling & Methodology: Git, GitHub Actions, CI/CD, Jest, React Testing Library, Jira, Agile / Scrum, SOLID, Clean Code, Code Ownership

PROFESSIONAL EXPERIENCE

Mercado Libre — Frontend Developer — Code Owner, VPP (Virtual Product Page)

Mar 2024 – Present | Remote · Latin America

- Code Owner of the Virtual Product Page (VPP) at Latin America's largest e-commerce platform, reviewing 200+ pull requests per quarter and gatekeeping changes that reach millions of buyers daily.
- Coordinate high-visibility feature releases for the VPP section: orchestrate multi-repo scope rollouts, internal regression rounds, canary deployments and production dashboard monitoring — triggering PR reverts when needed to safeguard changes reaching millions of buyers.
- Drove web accessibility (WCAG 2.1 AA, axe-core) fixes that reduced critical a11y violations by 20% across the VPP section, improving the experience for users with disabilities.
- Define frontend architecture best practices in React and TypeScript — component patterns, state management and testing — scaling reuse and visual consistency across multiple product surfaces.
- Pioneered AI-assisted development on the team (LLM agents, sub-agents, Model Context Protocol servers), applying these workflows on 200+ AI-augmented PR reviews to accelerate refactors, code generation and code quality on the React + TypeScript codebase.

Monks (formerly Zemoga) — Frontend Developer — Clients: Verizon, Morningstar (React / Vue / TypeScript)

Sep 2021 – Mar 2024 | Remote · US clients

- Delivered for Fortune-500 clients (Verizon, Morningstar) in fully English-speaking distributed agile teams, building UI for products consumed by millions of US users.
- Shipped 30+ reusable, tested UI components in React and Vue with TypeScript, achieving 60% test coverage and zero post-release regressions on owned modules with Jest + React Testing Library.

- Closed 100+ Jira tickets across 20+ sprints, translating Figma designs into pixel-accurate, responsive, accessible interfaces and partnering directly with designers to shorten the design-to-dev cycle.
- Applied SOLID principles and modular architecture; contributed to bundle-size reduction, lazy-loading, memoization and CI/CD pipelines, improving release stability and load performance.

Universidad de Manizales — Frontend Developer — Angular, D3.js

Oct 2018 – Dec 2020 | Manizales, Colombia

- Built analytics dashboards with Angular and D3.js, turning research datasets into actionable visualizations for academic and administrative stakeholders.
- Gathered requirements end-to-end and shipped responsive, data-heavy interfaces with a strong UX focus, reducing the time researchers spent interpreting raw data.
- Worked across two engagements with the university, building reusable Angular modules later adopted by other internal data products.

Bioinformatics and Computational Biology Center (BIOS) — Frontend Developer

May 2015 – May 2018 | Manizales, Colombia

- Contributed frontend to ClicSalud — a national public-health platform under the Presidency of the Republic of Colombia that lets citizens compare medication prices across the country, supporting transparent access to medication for millions of Colombians.
- Awarded Employee of the Year (2016) for outstanding performance and impact on the center's scientific and institutional web platforms.
- Built and maintained frontend modules for research and institutional web applications, establishing reusable component patterns later adopted by new projects across the center.
- Partnered with backend and research teams in agile cycles, translating complex scientific requirements into clear, usable interfaces.

INDEPENDENT / FREELANCE WORK

Freelancer.com — Preferred Freelancer — Independent Frontend / Fullstack / Mobile Developer (parallel to main employment)

2018 – Present | Remote · International

- Achieved and sustained Preferred Freelancer status — the platform's top-tier badge — with a 5-star rating across 17+ completed international projects in parallel with full-time roles.
- Designed, developed and published hybrid iOS / Android mobile applications end-to-end as the sole developer on the App Store and Google Play, owning UX, architecture, integrations and store submission.
- Built 50+ web-scraping and automation tools with Node.js (Puppeteer, Cheerio) for data extraction, monitoring and competitive analysis.

EDUCATION

B.S. in Systems and Telecommunications Engineering

LANGUAGES

Spanish (Native) · English (B1 — daily use with international teams at Verizon, Morningstar and Mercado Libre)
